

QUICK SIZE CHECK

This handy sizing chart makes it easy to get a reliable, accurate measurement of your child's feet. Since kids feet can grow up to a half size every three months, it's a good idea to measure often.

To make sure this chart printed at the correct size, place a quarter in the circle. If the quarter fits, it was printed correctly. If not, check that you are printing at 100%.

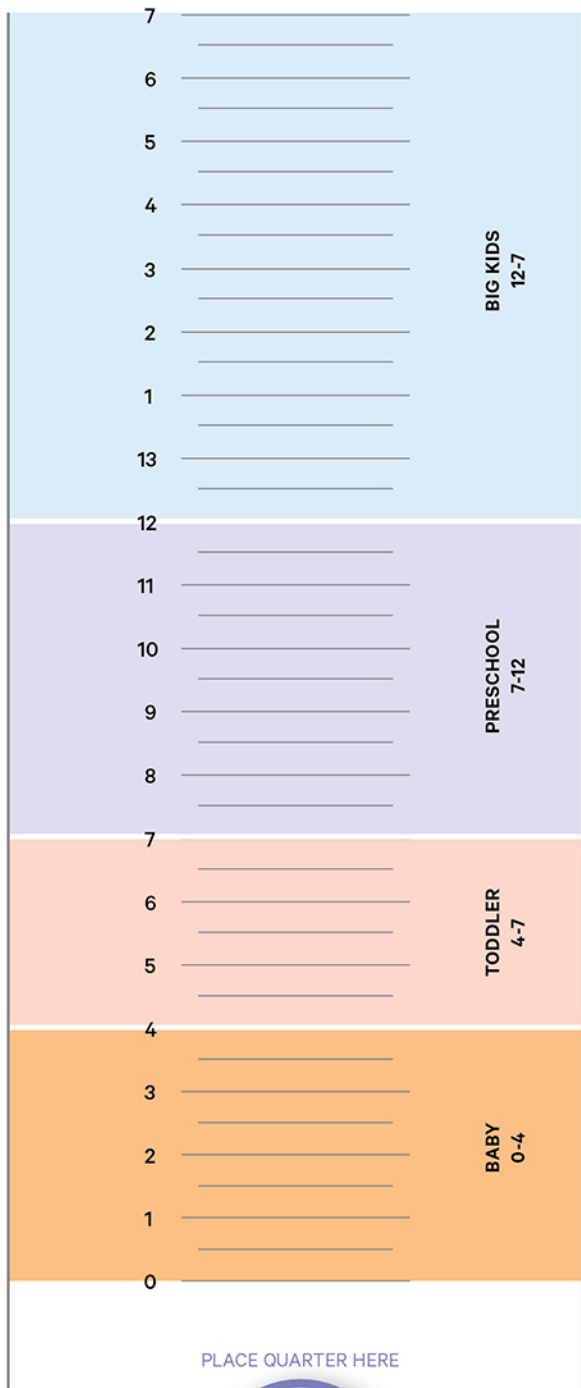

READY TO MEASURE?

STANDING TALL

- Have your child stand up against a wall or hard surface.
- Place heel on dotted line to match little feet icon.
- Find the first line past the longest toe and mark that exact point. This is your child's size.

NOW THE OTHER FOOT

- Be sure to measure both feet.
- It's very common to have one foot longer than the other, so go with the larger size when purchasing.
